All humans benefit from taking time to play and create.

Creative practices support you on this journey.

I channeled the contemplations from the Star Horses of Corolla, a group of wild horses living on the beaches of Corolla, North Carolina. These messages accompany each artwork that my good friend Regyna Curtis created.

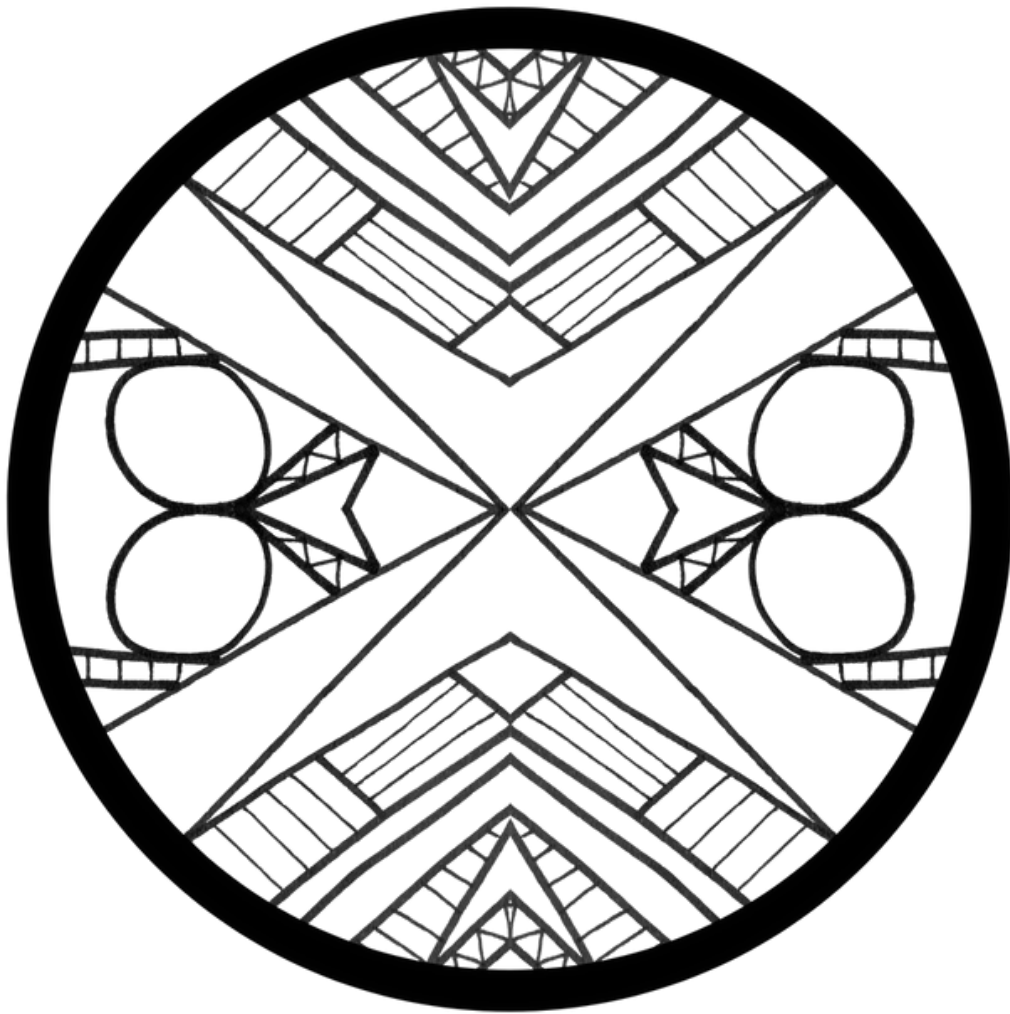

Each mandala in the coloring book was hand-drawn through an intuitive art method and then digitized. Each image is infused with the energy of the channeled message and accompanied by a statement or question for contemplation.

Enjoy the creative process as you connect with the Star Horses' unique energy.

Have fun just BEing!

Intention

The more you set intentions, the easier it will get. Eventually, everything that happens to you will be intentional.
